

# RHUBARB-TO PLANT Crop Code: 3044

## Standard Message:

After applying all recommended amendments for fertility and pH control, immediately till or plow thoroughly to a depth of 12 inches or more. When plant is 8 inches tall, sidedress with an additional 60 lbs nitrogen (N) per acre. Every 4 years split the crowns on 25% of your current acreage. Repeat 5 years later. This way an initial planting will be productive for about 25 years.

To convert recommendations from lbs/acre to lbs/100 square feet, divide all recommended values by 435.

## Lime and Magnesium Recommendation:

pH Goal: 6.0

Opt soil test Mg (ppm): 120

**Nitrogen Recommendation (lb N/A): 200**

## Phosphorus Recommendation (lb P<sub>2</sub>O<sub>5</sub>/A):

(Optimum soil test P: 35 - 70 ppm)

Soil test P (ppm)	P <sub>2</sub> O <sub>5</sub> lb/A
0	300
5	285
10	270
15	255
20	240
25	225
30	215
35	200
40	190
45	180
50	160
55	140
