Thursday, May 26

Octoraro Watershed: Outreach & Technology Transfer in a Plain Sect

Community. To be successful in restoring water quality, Pennsylvania's watershed organizations must cultivate their own approaches to meet the unique, cultural needs of the audiences in their communities. In the case of the **Octoraro Watershed Association**, founded in 1967 in Lancaster County, its innovative approaches to reaching Plain Sect agricultural leaders and transferring technology is a model for whole community watershed improvements.

Join Octoraro Watershed Association President, Dr. John Shuman—who is also an Associate in the consulting firm of Johnson, Mirmiran & Thompson, Inc. to learn more about the Octoraro approach. For more information about the Octoraro Watershed Association, visit its website at: <http://www.theowa.org/>

This Week's Program

To join the webinar live:

1. Please sign up for a free "Friends of Penn State" digital identity (user ID and password) at <https://fps.psu.edu/>.
2. On May 26—at NOON—sign in at <http://breeze.psu.edu/PAWatersheds> to hear the program live.

***LESSONS FROM THE LAND** Sharing the Stories of Pennsylvania's successes and challenges across the Landscape. Recordings of past sessions can be viewed at:*
