

# GARLIC Crop Code: 3014

## Standard Message:

Broadcast fertilizer and disk about 6 inches deep before planting in the fall. When plants are approximately 6 inches tall (about March 15), topdress with 25-25-25 pounds per acre of nitrogen-phosphate-potash. Topdress with about 25 pounds per acre of nitrogen around May 1. Apply all topdressings to dry plants at midday to reduce change of fertilizer burn. Consider using Ammonium Sulfate for this last (May 1) topdressing, since sulfur may enhance pungency.

For additional information, see back messages 1,2,6,7,8,9 and 12.
