Penn State Extension Latinx Agricultural Network – Goals and Accomplishments

Advancing Penn State Extension Hispanic/Latinx Outreach Efforts in PA

Ilse Huerta-Arredondo, Tara Baugher, Carolee Bull, Maria Gorgo-Gourovitch, Melanie Miller-Foster, Elsa Sanchez, Kathleen Sexsmith, Lydia Stivers, Emma Rosenthal
The Pennsylvania State University

We believe all people should have access to science-based education
(Penn State Extension, n/d)

Introduction

• The Hispanic/Latinx population in Pennsylvania increased from 5.7% in 2010 to 6.6% in 2016 (U.S. Census Bureau, 2011, ACS, 2016).

• The agriculture industry in Pennsylvania relies heavily on Hispanic/Latinx workforce, and a growing number of next generation producers are Latinx.

• For at least the past ten years, several Penn State Extension educators have worked in an ad hoc manner to offer educational programming in Spanish for Hispanic/Latinx agriculturalists.

• However, a framework within Extension and the College of Agricultural Sciences for serving the Hispanic/Latinx community has not been adopted.

Past and Current Efforts

A few examples of the extension and research work that has been conducted to attend this population:

1. Spanish-session at the Mid-Atlantic Fruit and Vegetable Convention. 10 years
2. Several trainings in Spanish (tractor safety, electrical hazards, pruning of fruit trees)
3. Study course for pesticide license
4. Field demonstrations
5. Community days
6. Mushroom industry short courses
7. Workshop series: “Bringing More Hispanic Farmers/Farmworkers to Extension Programming”
8. Research on Mushroom labor shortage
9. Research on Hispanic farmers in PA

Who are we?

Working team of faculty, Extension educators and graduate students with a desire to coordinate and advance extension and research service efforts for Spanish-speaking audiences.

Goal
Create a network that will enhance the ability of Hispanic/Latinx farmworkers, farmers, aspiring farmers and their families to earn a sustainable livelihood and obtain a high quality of life in the Pennsylvania agriculture industry.

Future Steps

• Extension impact grant → bring extension educators and extension faculty together to evaluate Penn State Extension’s service to the Latinx community and propose policy changes to enhance that effort.

• Create a Latinx Ag Research Center (LARC)

• Re-structure our Latinx Ag Task force to manage projects corresponding to the branches highlighted in Figure 3

• Recommendation → college should put together wide effort to facilitate communication between research, extension, and education

Morning Ag Clips: PSU Extension Victory Garden program supports Latino community

Article: https://www.morningagclips.com/psu-extension-victory-garden-program-supports-latino-community/

“Penn State Extension Master Gardeners expected there would be a renewed interest in home gardening in 2020 due to the COVID-19 pandemic. As a result, they developed the 10-part “Victory Garden Reinvented!” webinar series to support gardeners across the country. In 2021, the Master Gardener program and the Penn State Extension horticulture team expanded this effort — aiming to reach the Latino community — and the webinars now are available in Spanish.”

Published on August 11, 2021, University Park, Pa.

Penn State News: Penn State Extension Victory Garden Program supports Latino community

“In addition to the webinars, nine fact sheets were translated by team members to provide additional information for gardeners and new farmers. Gorgo-Gourovitch noted that native Spanish speakers translated the webinar scripts and PowerPoint slides.”

Penn State Extension Latinx Agricultural Network – Goals and Accomplishments

“Profesores y educadores de Extensión de Penn State en el Colegio de Agricultura crearon una página de Facebook 100% en español (https://www.facebook.com/PennStateAgriculturaEnEspanol) que proporcionará a productores y empleados de campos con recursos innovativos, basados en ciencia, de fácil acceso y en español, lo cual será muy conveniente durante el periodo actual de distanciamiento social.”

Latinx Agricultural Network formed at Penn State to address community's needs | Penn StatePSU

UNIVERSITY PARK, Pa. — A new strategic planning group at Penn State seeks to enhance engagement and continue to provide support to Pennsylvania’s Latinx agricultural community.

“We are delighted to be on the forefront of research, education and outreach efforts to our valued partners in the Latinx community,” said Carolee Bull, professor and head of the Department of Plant Pathology and Environmental Microbiology in the College of Agricultural Sciences, who is among those leading the initiative.

“Our goal is to help Latinx growers achieve quality agricultural production, experience satisfaction in their workplaces, and enjoy a high quality of life.”

Penn State Extension marks milestone in outreach to Spanish-speaking growers | Penn State University

PSU Article: https://news.psu.edu/story/572970/2019/05/06/impact/penn-state-extension-marks-milestone-outreach-spanish-speaking

UNIVERSITY PARK, Pa. — For close to a decade, Jorge Manzo has worked at McCleaf’s Orchard, a fifth-generation family farm near Gettysburg in Adams County, where he is responsible for preparing a wide variety of fresh fruits and vegetables for market, including a few of his favorites — kiwi, blackberries and raspberries.

Like other growers, he understands the need to keep abreast of changes in the market and the latest practices and technology by participating in continuing education. However, as a Latin American immigrant, opportunities to learn in Spanish haven’t been easy to find, a circumstance that sometimes places him, and even his employer, at a disadvantage.
Penn State Extension Latinx Agricultural Network – Goals and Accomplishments

And he is not alone. According to the 2017 U.S. Census of Agriculture, the number of Hispanic principal operators in the country now stands at 90,344, up from 67,000, the figure reported in the 2012 census.....

Extension Outreach for a Promising Next Generation of Specialty Crop Growers (Extension Impact Video)

Posted: March 22, 2019

Penn State Extension is extending its outreach to a promising next generation of specialty crop growers from diverse backgrounds. Bilingual educational programs enhance the capacity of the specialty crop industry to increase economic and environmental sustainability. The Young Grower Alliance offers opportunities for "Next Gen" horticulturists to not only learn but also to lead and connect.

Penn State Extension Team Receives National Award for Excellence in Programming

The National Association of County Agricultural Agents (NACAA) presented an award for excellence to Penn State Extension Educators for “Supporting Pennsylvania Farmers in the Start-Up, Re-strategizing and Establishing Years.”
