

# Farm Energy Day

*Adams County Feature: Solar Power*

This Farm Energy Day program will provide an overview of sustainable and renewable ("green") energy issues as they relate to farmers and landowners and discuss potential solutions that offset system costs, offer tax credits, and produce returns on the investment. Special attention will be given to solar power production on the farm. The objectives of the event are to educate farmers and landowners about green energy technologies that they can implement in their own operations to reduce costs and/or fossil fuel dependence and/or to which they can contribute by growing and selling feedstock. This program will connect participants to resources that help them engage in these activities and will also showcase successful operations, including a tour of a nearby operational photovoltaic array.

**Friday, March 15, 2019**  
**9:00 a.m. - 4:00 p.m.**

Adams County Agricultural and  
Natural Resources Center  
670 Old Harrisburg Road  
Gettysburg, PA 17325
