

Plant Science Spring Seminar Series

All seminars are held in 101 ASI Bldg, 12:20pm-1:10pm

Date	Speaker	Title
1/19	Sjoerd Duiker Professor in Plant Science	Integration of grazing into no-tillage systems
1/26	Julie Razryadov Graduate Student in Horticulture	Green roofs and their plants - evidence for maximizing diversity for increased performance
2/2	Virginia Jin USDA, ARS Agroecosystems Management Research Unit, Lincoln NE	Management Impacts on the Global Warming Potential of Annual and Perennial Biofuel Systems
2/9	Leanna Dupstadt Graduate Student in Agronomy	Impact of Grazing Management, Monensin Supplementation and Weed Density on Beef Cow-Calf Performance and Pasture Production
2/12 (Monday)	Brent Helliker Assoc. Professor of Biology, University of Pennsylvania School of Arts and Sciences	The legacy of C4 evolution in the hydraulics of C3 and C4 grasses
2/23	Tim Lulis Graduate Student in Agronomy	Impact of cultural practices on plant health and putting green performance during golf tournament preparations
3/2	Frances Moore Assistant Professor Department of Environmental Science and Policy, UC Davis.	Estimating the Effects of Climate Change on Global Crop Yields: Economic Consequences and Implications for Climate Policy
3/16	Peter Tiffin, Professor, Director of Graduate Studies, Department of Plant and Microbial Biology, University of Minnesota	Genomics of environmentally-dependent selection; legumes and rhizobia as a model
3/23	Heidi Myer Graduate Student in Agronomy	Planting green: Lessons learned from planting corn and soybeans into living cover in southeast and central Pennsylvania
3/30	Jess Buchek Graduate Student in Agronomy	Integrating cover crops in no-till annual grains to diversify herbicide-resistant weed management
4/6	J. Arbuckle, Sociology department of Iowa State University	Sustainable cropping systems symposium Keynote
4/13	Drew Harner Graduate Student in Horticulture	Detailing Meso- and Microclimatic Influence on Wine Grape Aroma: A Look at Black Pepper Aromas in Pennsylvania Wine Grapes.
4/20	Maria Smith Graduate Student in Horticulture	Evaluating the effects of management strategies on cold stress in wine grapes
4/27	Suzanne Fleishman Graduate Student in Horticulture	Controls on grapevine vigor: decoupling cover crop competition and rootstock

Lauren Abersold
Administrative Support Assistant 3, Undergraduate Support
Chair—Staff Advisory Committee to the Dean
