

Sponsored by the Huck Institutes' Genomic Core Facility

What's New in Genomics: Sequencing Applications Updates From Illumina

Speaker: Dan Gheba, Sr. Sequencing Specialist, Illumina, Inc.

Join us for a presentation and discussion around hot applications in genomics as well as new products from Illumina. Topics will include microbial profiling with metagenomics, single cell analysis, and amplicon sequencing solutions for any organism.

Learn more about what the Genomics Core Facility at Penn State can do for you and your research.

When: Wednesday, October 4th

Time: 12:15 - 1:15pm

Where: 108 Wartik Lab

After the talk, from 2:00-4:00pm, office hours will be available for additional questions and project discussions with the Genomics Core and Illumina team in 412 Chandlee Building.

Please contact Craig Praul (cap142@psu.edu) if you'd like to reserve a time slot during office hours.
