CHANGING THE GAME. AGAIN.

At John Deere, we're always looking for ways to improve the efficiency of your logging operation. With expert insight from our Customer Advocate Groups (CAG), our new L-Series line of Skidders and Wheeled Feller Bunchers can do just that. Their larger cabs feature keyless start and adaptable control options. And their improved serviceability features include easier access to critical components, JDLink™ and remote diagnostics. Forget best-in-class. We designed these machines to be "best-in-forest." Because at John Deere, We're For Loggers.

Learn more about our game changing machine lineup at JohnDeere.com/GameChangers.

PROUD SPONSORS OF TIMBER 2015
Welcome to Timber 2015

It makes perfect sense for such an event be held in Pennsylvania. The state is blessed with a vast high-quality, renewable resource and the breadth of hardworking and successful forest product companies and entrepreneurs.

Please take some time stop by the PFPA booth today and learn more about what we are doing to help the industry. Our Directors and staff will also be happy to provide information about the benefits of becoming a PFPA member.

Timber 2015 is just one of the activities and efforts of the Pennsylvania Forest Products Association. PFPA is the recognized and respected voice for the industry in Pennsylvania on legislative and regulatory affairs.

We also continue to lead the way on providing education and outreach thorough various initiatives such as the newly refurbished Pennsylvania WoodMobile.

We are grateful to PFPA equipment and service suppliers and other exhibitors participating in the Timber 2015 and it is our wish that the weekend is profitable to you.

We especially thank Ag Choice Farm Credit, Foster F. Wineland Inc., Pendu Manufacturing, and Taylor Machine Works for their sponsorship and support of Timber 2015.

Timber 2015 is co-hosted by the Pennsylvania Forest Products Association and Penn State’s College of Agricultural Sciences. Bob Oberheim, Deb Ellis and the other staff at Penn State are again providing a great venue and the operational expertise to make this a successful event.

Enjoy your day at Timber 2015.

Pennsylvania Forest Products Association
The Voice of the Forest Products Industry in Pennsylvania

The Pennsylvania Forest Products Association (PFPA) is proud to be a co-host of Timber 2015.

There are 268 companies who are members of PFPA, representing all segments of forest products production and manufacturing, as well as companies providing equipment and services to the industry.

It is the mission of PFPA to promote the common interests of the forest products industry within Pennsylvania by:

• Creating a regulatory environment in Pennsylvania that enhances the profitability of the entire forest products industry.
• Creating among the general public an increased knowledge of, and appreciation for, the value of the forest products industry in Pennsylvania, and the contributions the industry makes to forest sustainability.
• Increasing the amount of information available to the industry regarding legislative and regulatory issues, technical matters, and activities within the industry.

Track Record of Advocacy Success

PFPA is the recognized voice for industry and forestry in Harrisburg and we work daily on legislative and regulatory issues that affect your business. PFPA represents the forest products industry on more than a dozen formal state agency advisory committees, helping to guide these agencies on issues such as hardwood promotion, forest health and management, research, and truck safety.

Some of the Key Issues that PFPA is currently working on include:

• PFPA supports addressing the inequity in the state tax code by expanding the current sales tax exemption for agricultural equipment and material to also cover equipment and material used in commercial timber sales.
• PFPA supports appropriate changes to Bureau of Forestry policy which will allow for greater use of mechanized timber harvesting equipment on more state forest timber sales.
• PFPA is working with DCNR, HDC and DCED to address Governor Wolf’s desire to expand wood products industry in PA.
• PFPA will prepare and coordinate a response to the Bureau of Forestry’s revision to its State Forest Resource Management Plan, which is expected to be open for public comment this summer. This provides an opportunity to evaluate and hopefully expand the annual timber harvesting levels on DCNR lands.

We are also a valuable resource to assist our members to successfully navigate state and local regulation.

Educating the Public

PFPA has been a leader in educating the public about the importance of sustainable forestry and the role that our companies play in creating jobs across our state.

This year we helped refurbish the Pennsylvania WoodMobile, which includes new interactive displays. The original WoodMobile delivered educational programming to 148,353 students and teachers and hosted nearly 1.4 million visitors at public events. It participated in 715 events and was in use for 1,414 days. Every county in Pennsylvania was visited at least once.

Informing Industry

PFPA keeps its members and others in the industry updated on the happenings in Harrisburg and across the state through its weekly update The Ticker and publication of the Pennsylvania Marketing Bulletin. It provides information and education through this biennial Timber Show, Annual Meeting, annual Forest Products Executive Development Workshop, Regional Meetings, special seminars and workshops. It also raises funds through the Log and Load for Kids to support Children’s Miracle Network Hospitals in Pennsylvania.

PFPA also is the administrative host of the Pennsylvania Sustainable Forestry Initiative®. The PA SFI® State Implementation Committee in Pennsylvania provides logger training, landowner outreach and promotion of the use of sustainable wood and paper products. There are over 600 individuals who are current with their PA SFI logger training.

New Dues Structure

This year, PFPA revised its dues structure to make it easier to understand for potential and existing members. It reduced the primary member categories from 9 to 6 and the overall number of levels in the dues structure from 28 to 20. It also provides new dues levels in some categories to better attract smaller companies and landowners into PFPA membership. This is the first time in PFPA has revised its dues for more than a decade. The new dues structure can be found on page 7.

The Department of Ecosystem Science and Management

Then and Now

Penn State was founded in 1855 as the Farmers’ High School, and in 1863 was designated as the Commonwealth’s land-grant institution. Forestry education in Pennsylvania began at the State Forest Academy, established in 1903 by Dr. Joseph Rothrock at Mont Alto. The Department of Forestry at University Park was established in 1907 and absorbed the State Forest Academy in 1929. A wood products curriculum was added in 1942, and a wildlife and fisheries science curriculum was created in 1981.

In 2012, academic department reorganization led to the creation of the Department of Ecosystem Science and Management (ESM). The new department merged the School of Forest Resources with faculty from other departments having expertise in soil science and plant ecology to more effectively address problems and challenges related to natural resources, ecosystems and the environment.

With strengths in forestry, wildlife, fisheries, wood products, and now soils and water, ESM is an attractive department for faculty working on any of the myriad problems of natural resources, ecosystems, and environment.

ESM now has 28 faculty members, along with 15 instructors, lecturers, and federal scientists who are adjunct faculty members. The academic programs serve approximately 90 graduate students and 200 undergraduates.

As part of the reorganization, the Wood Products academic degree program moved to the Department of Agricultural and Biological Engineering (ABE) as part of a new degree program titled BioRenewable Systems. This new program will include most of the educational and training opportunities currently offered in the Wood Products program.

The Department of Ecosystem Science and Management’s two professional foresters oversee more than 8,000 acres of University-owned forestland that serves research and teaching goals. The Forest Resources Building provides a contemporary space for research, teaching, and extension activities along with professional facilities that reflect our commitment to continue to recruit and support the best faculty and students.

ESM plays a central role in addressing natural resource issues through cooperation with industry, nonprofit organizations, and federal, state, and municipal governments. The Department is Pennsylvania’s leading institution for educating professionals to sustainably manage our renewable natural resources, as well as the state’s primary research institution for the creation of new knowledge in forestry, wildlife and fisheries, and other natural resource areas.

Outreach

The Department has a strong statewide focus on extension education dealing with forest resources, urban and community forestry,
The Department of Ecosystem Science and Management

water resources, wildlife and fisheries, wood products, and soil conservation. Penn State Extension faculty work closely with extension educators and partner agencies to deliver extension education programs locally. In addition, 15-20 professional development programs are offered annually, dealing with diverse topics, such as GIS/GPS in forestry, forest taxation, wood products, and The Goddard Forum.

Another aspect of outreach is a large and active alumni group comprised of nearly 5,000 alumni living in 50 states and 21 countries. The Department has an advisory board that provides opinions and guidance from professionals and officials representing influential patrons and stakeholder groups.

Undergraduate Education

The mission of the Forest Ecosystem Management degree program is to provide students with the knowledge, skills, and professional ethics for understanding and managing forest ecosystems, and living as responsible members of society. A career in forestry may include working in forests, in the laboratory, or in an executive suite as a procurement agent for wood products firms, forest manager, consultant, urban forester, or watershed specialist. Job placement in these areas is promising, and our graduates have enjoyed a very high placement rate in recent years.

The Wildlife and Fisheries Science major is designed for students interested primarily in conservation and management of wildlife and fish species and their habitats. This challenging curriculum provides concepts, principles, and techniques of wildlife and fisheries science and natural resource conservation and management. Wildlife and fisheries graduates find employment as wildlife and fisheries technicians, biologists, conservation officers, natural resource managers, education specialists, teachers, research scientists, and administrators. Many students will also pursue a graduate degree. Graduates truly love their careers.

Research and Graduate Education

Graduate studies in the Department concern three major subject matter areas: forest resources, wildlife and fisheries science, and soil science. The objectives for students enrolled in the programs are to gain proficiency in research, education, scientific technology, and management in natural resources and related fundamental science disciplines.

Faculty and graduate students are involved with interdisciplinary and intercollegiate graduate degree/option programs and affiliations such as Ecology, Environmental Pollution Control, Plant Biology, Genetics, and the Materials Research Institute. Extramural research funding exceeds $10 million per year, and research is strongly interdisciplinary, including work with groups such as the Penn State Institutes of Energy and the Environment.

Research focal areas range widely, but include acid deposition effects on regeneration, soils, water resources, and fish and wildlife; timber harvesting impacts on water quality; human-wildlife interactions; fisheries ecology and management; biodiversity conservation; habitat restoration; invasive species; and bioenergy.
Timber Show 2015 Door Prizes

Must be a registered attendee of the show (register on site)
Drawing to take place on Saturday, June 6 @ 2:30pm.
Attendees do not need to be present to win.

Prizes

Stihl Chainsaw

One Year Membership for non-member in the Pennsylvania Forest Products Association
(or 25% reduction in next year’s membership dues if current PFPA member)

$100 Gift Card for Walmart

$50 Gift Card for Bass Pro Shops

18-month subscription to the Pennsylvania Marketing Bulletin
- 15 of this prize to be awarded

PA SFI Continuing Education Courses
Red Morton Bldg. on Main Street and East Sixth St.
Friday, 1:00 p.m. - 4:00 p.m. OR Saturday, 9:30 a.m. - 1:00 p.m.

It is free to attend the course (public welcome). A $20 administrative fee will be required for loggers to register this course for PA SFI CE credit. The course will cover four hours (one year) of PA SFI credit and include both classroom and in-field instruction. Questions or to preregister visit PA SFI website: www.sfiofpa.org or call (814) 355-1010. The primary topics of the course are:

• Care and safety considerations for maintaining hydraulic and diesel engine systems

• Issues related to harvesting and regenerating the forest utilizing a 2012 harvest, with emphasis on best management practices, invasive plants and insects, competing vegetation, and deer browse impacts.

Visit Pasto Agricultural Museum
Main Street, Above East 9th Street
Open all hours of the show
Oral History Presentations at 10:30 a.m. and 2:30 p.m.

Relive history at the Pasto Agricultural Museum with new displays and hands-on-exhibits. Take a look at historic logging and timber production. Museum staff will share old photos and stories of the days in the late 1800s and early 1900s when Williamsport was the logging capital of the world. The “Axe Whisperer”, (a.k.a. Jim Walizer, a board member of the Pennsylvania Chapter of The American Chestnut Foundation) will share his passion for the history of timber, logging and forestry in the commonwealth in presentations at 10:30 a.m. and 2:30 p.m. Join us to hear the axe’s story of hardened steel and hard work.

Pennsylvania WoodMobile
Main Street

The Pennsylvania WoodMobile is a traveling exhibit that provides information on the state’s forest resource and the state’s forest products industry. Visitors to the exhibit will see how the forests of Pennsylvania have shaped the history of the state and nation, learn how today’s forest differs from 100 years ago, touch the various hardwood species produced in Pennsylvania, and use touchscreen technology to interact with various threats to the forests such as invasive insects and plants, diseases and white-tailed deer.

Game of Logging-National Finals
Competition for Landowner and Pro Logger Divisions

(Saturday Only)
West 9th Street and Demo Alley

Game of Logging (GOL) is a world-recognized training curriculum that teaches chain saw skills. The “game” refers not only to the friendly competitive aspect of the training, but also to the necessity of having a winning plan or strategy for felling trees and working safely. The qualifiers from the state level will participate in this competition. GOL offers four levels of chainsaw safety training, as well as skidder, forwarder, clearing saw, gentle logging and storm damage training. The training is offered to professional loggers, foresters, college students, forest landowners, casual users, city-parks and utility workers, firemen, and anyone interested in learning any of the chainsaw safety techniques. In Pennsylvania contact: Game of Logging, 9600 Main Street, Suite Three, Clarence, NY 14031-2093; phone (800) 252-2502; e-mail info@gameoflogging.com.

Preliminary events begin at 9:00 a.m.
• Speed Cut
• Precision Cut
• Bore Cut
• Precision Stump
• Big Stump
• Spring Pole
• Bucking
• Limbing
• Aiming

Tree Felling event begins at 1:00 p.m.

The Taylor Machine Works, Inc. line of heavy duty forklift trucks, log stackers, container handlers and specialty machines continues to lead the industry due to our emphasis on ruggedness, reliability and support. For over 87 years now, Taylor’s unwavering commitment to the key concepts of FAITH-VISION-WORK by the members of the Taylor family and employees make this worldwide organization a leading manufacturer in the United States for industrial forklifts and material handling equipment.

Taylor Machine Works engineers and builds what you need. Taylor prides itself on being able to design, engineer and manufacture specific tailored material handling equipment for all your needs. All Taylor equipment is supported 24/7 by our Sudden Service, Inc. after market support company.

Finally, Taylor’s reputation for commitment and support is apparent by Taylor machines remaining at the top of the list in resale value. Taylor equipment is the lowest total cost machine due to its long lasting ability to perform.

We are committed to providing you with the best equipment, the best after sales-support, and the best over-all ownership experience available. Visit us at the corner of Main St. and West 8th St. to see our equipment and learn about over 100 other models ranging in lift capacities from 16,000 lbs to 125,000 lbs. in 24-inch, 36-inch, and 48-inch load centers.
PROUD TO PRESENT FOR 2015
THE ALL NEW PENNSYLVANIA WOODMOBILE
“AN EDUCATIONAL WALK IN PENN’S WOODS”

1.5 Million Visitors Hosted
156,000 Students Educated

Special Appreciation to Deer Park Lumber, PFPA and the
61 Pennsylvania companies and organizations that contributed their time,
materials and funds for the new exhibit!

Business and Lending Expertise for the Forest Products Industry

MECHANICSBURG (Cumberland Co.)- Forest Products Credit by AgChoice FC is devoted to providing innovative lending and financial services to the forest products industry throughout its service territory.

AgChoice has more than $141 million in loan dollars invested in the Pennsylvania timber industry, and loan officers specializing in the forest products industry are available at all 10 of its regional offices. Customer-ownership is a key part of how AgChoice Farm Credit does business. Recently, AgChoice distributed $17 million in cash patronage to its customer-owners based on 2014 profits. Returning profits to its customers in the form of patronage is a unique benefit to AgChoice’s cooperative structure and complements the Association’s shared purpose statement of Inspiring Growth in Our Families, Businesses and Rural Communities.

Forest Products Credit by AgChoice FC services go well beyond simply making timber-related loans and leases by specializing in providing custom solutions designed to meet the individual needs of your operation. Its team of experts is dedicated to serving you and the entire forest products industry.

The Forest Products Credit by AgChoice FC team’s extensive financial knowledge, industry involvement and commitment to your success are key differentiators from other lenders. With two in-house foresters on staff, its team can provide the expertise you expect and the quality you deserve. AgChoice understands timber, timberland and forest products industry trends, along with woodland management, timber pricing, timber cruising, appraisals and your specific loan needs.

In addition to industry involvement, Forest Products Credit by AgChoice FC publishes a quarterly newsletter, The Forest Focus. This newsletter contains valuable information, newsworthy notes and educational items regarding the trends of the industry. It is also proud to co-host the Forest Products Executive Development Program with the Pennsylvania Forest Products Association each fall. This year’s program will take place on Tuesday, September 29 at Toftees Resort and Conference Center, State College. If you want to hear the latest trends in the forest products industry, then plan to attend this very worthwhile seminar.

During Timber 2015, be sure to visit Forest Products Credit by AgChoice FC team members in the AgChoice building located on Main Street to learn how they can help you succeed in your operation. To contact a member of the Forest Products Credit by AgChoice FC team call 1-800-998-5557 or visit www.agchoice.com.
About Penn State’s College of Agricultural Sciences

The College of Agricultural Sciences—the first of the colleges established at Penn State—awarded the nation’s first baccalaureate degrees in agriculture in 1861. Today, the college is broadly recognized as one of the nation’s premier institutions for research and educational programs in agriculture and natural resources.

Undergraduate Studies

More than 3,000 undergraduates choose from 17 majors, 24 minors, and four two-year programs. Natural resource related majors include Environmental Resource Management, Forest Ecosystem Management, Wildlife and Fisheries Science, and BioRenewable Systems. About 80 percent of the college’s undergraduates come from non-agricultural backgrounds. The college has one of Penn State’s largest scholarship programs, awarding $2 million annually.

Research

The college annually conducts nearly $97 million in research projects involving faculty, staff, and undergraduate and graduate students. Scientists conduct basic, applied, and developmental research in subject areas ranging from biotechnology and genetics to forest regeneration and animal health. The college maintains 13,800 acres of research forest and farmland, including the Russell E. Larson Agricultural Research Center at Rock Springs and the Experimental Forest at Stone Valley. The college’s research addresses critical issues of agrosecurity, business profitability, environmental impact, youth development, food safety, rural sustainability, resource development and utilization, and natural resource conservation.

Visit Penn State’s College of Agricultural Sciences on the Web at http://agsci.psu.edu

Penn State Extension

Penn State Extension is a statewide network that links the resources of the college and university to individuals, families, businesses and communities in each of Pennsylvania’s 67 counties. Extension reaches more than 750,000 households annually with research-based information and educational programs in agriculture; natural resources and environmental management; 4-H/youth development; community resources and economic development; family development and resource management; leadership and volunteer development; and nutrition, diet and health.

Forest Products Credit by AgChoice FC’s team of Forest Products lenders understands the day-to-day management of your operations, the latest techniques and technology in the industry and standard operating procedures. They are an added-value resource, focusing their time on developing the most effective financial management strategies for Forest Products customers.

Forest Products Credit by AgChoice FC offers a variety of loans and leases to finance all segments of the Forest Products industry from tree to table and all sectors in between. If you are looking to purchase a log skidder or truck or need a line of credit to purchase standing timber - then you need a lender who understands the timber industry.

Visit us at our booth located in the AgChoice Building on Main Street during Timber 2015 and learn how our Forest Products team members can provide you the expertise you expect and the quality you deserve.
